MANISH BISTA

manishbista.ai@gmail.com | (929) 373-9892 | Brooklyn, NY
linkedin.com/in/manish-bista | github.com/codereyinish | manishbista.com

AI engineer building production speech and ML systems — real-time transcription, serverless GPU inference, and the cloud infrastructure they run on. Two years shipping and operating software with live users.

EXPERIENCE

Founder — ClassRec classrec.com | Jan 2026 – Present
Python · FastAPI · Modal · WebSocket · Clerk · Sentry

- Built and deployed a full-stack web app enabling students to upload or live-record lectures and receive AI-generated transcripts
- Eliminated ~30% of hallucinated transcript segments by integrating Silero VAD via ONNX Runtime for silence detection before passing audio to Whisper
- Deployed faster-whisper large-v3 on Modal serverless GPU (T4), cutting per-lecture inference cost ~65% vs OpenAI Whisper API while improving accuracy on accented speech

AI Engineer — TalentSathi (Freelance) Feb 2024 – Present
Kathmandu, Nepal · Remote

- Built a classifier that flags bot and fraudulent applications before they reach human reviewers, filtering spam out of the recruiter queue
- Automated first-pass candidate screening, cutting review time from 1 hour to 10 minutes per 100 applications

Technical Solutions Engineer — NestNepal 2026 – Present

- Scoped and sized cloud infrastructure for customer workloads, translating traffic, storage and uptime requirements into concrete server, storage and network configurations

EDUCATION

St. Joseph's University, New York — Brooklyn May 2026
B.S. Mathematics / Computer Science | Minor in Data Science | GPA: 3.6 / 4.0

PROJECTS

ColdVPN & ColdSpot — Your Own One-Click VPN github.com/codereyinish/ColdVPN
Go · WireGuard · Networking · Cloud

- Zero-config VPN: one download sets up a private server and starts encrypting all device traffic automatically
- Captures traffic at the network layer, so even apps that bypass proxy settings are tunneled; ColdSpot relays it through a paired iPhone to a self-hosted exit server

CloudBot — AI Food Ordering Chatbot github.com/codereyinish/CloudBot
Python · FastAPI · Dialogflow ES · Docker · GCP Cloud Run · Cloud SQL · Cloud Build

- AI chatbot that takes food orders in natural language and processes them in real time
- NLP intent recognition with Dialogflow ES; FastAPI webhook persists orders to Cloud SQL

MBGPT — Fine-tuned LLM for YouTube Comment Replies github.com/codereyinish
Python · Mistral-7B · QLoRA · PEFT · HuggingFace · Gradio

- Fine-tuned LLM that generates context-aware replies to YouTube comments
- Quantized Mistral-7B with QLoRA, cutting model size ~75% and enabling CPU inference on a 16GB MacBook
- Parameter-efficient fine-tuning (QLoRA/PEFT) on a custom YouTube comment dataset

TECHNICAL SKILLS

AI / ML: PyTorch, HuggingFace, Transformers, LangChain, faster-whisper, Streamlit
Backend & Cloud: FastAPI, Node.js, Docker, Modal, GCP (Cloud Run, Cloud SQL, Cloud Build), DigitalOcean
Languages: Python, JavaScript, Java, Go, C, R, HTML5/CSS, SQL
Networking: WireGuard, TCP/IP, SOCKS5, TLS, Terraform
Data Science: Pandas, NumPy, Jupyter, Conda
Tools: Git, GitHub, GitHub Actions, Linux, VS Code, IntelliJ IDEA, Maven, Sentry, Clerk, Dialogflow ES
Frontend: React, Astro, Vanilla JS, Jinja2
